EXPERIENCE

Welikesmall → Thinkingbox · Senior Frontend Developer · August 2015 - Present

Started at Welikesmall as a Junior Frontend Developer working on award-winning projects that involved using languages such as Python, Elixir, Java, PHP, JavaScript, and SCSS/CSS. In August of 2017, I was promoted to Sr. Frontend Developer. In January of 2020, after gaining broad recognition for our work, Welikesmall was acquired by Thinkingbox and I held my position during the process. Some of our notable clients who I personally worked with include Starbucks, Adobe, Verizon, Riot Games, Happy Egg, and Workfront.

Firetoss · Web Developer · January 2014 - August 2015

Started at Firetoss (then called PoleVault) as an intern, working on Wordpress sites for marketing clients. Shortly thereafter, I was hired on full-time as a Web Developer and was given full responsibility for building new sites for our clients. I was able to guide the development team into writing custom Wordpress themes from scratch, establishing that as the norm going forward. Languages for these projects included PHP, JavaScript, and LESS/CSS. Notable clients included The Utah Arts Council, Uptown Cheapskate, and Kid to Kid.

Apple, Inc. · AppleCare CPU Technician · May 2011 - October 2013

Worked in AppleCare as a Technical Support CPU Tier 1 Advisor, fielding calls from customers regarding issues including Mac OS X, Apple Mail, iCloud, iTunes, Apple ID password and security, and hardware failures for all Apple computer models. In February of 2012, I received an AppleCare Excellence Award for exceptional call metrics.
